COMPANY BIO

Established in 1986, **EASI** has continuously evolved to meet the changing needs of our clients, becoming a cornerstone in the building services industry of Maryland and Delaware. Our mission is to deliver the most technologically advanced and intuitive solutions that make the environments where we live, work, learn, and play, smarter, more secure, healthier, and more efficient. This commitment drives us to develop long-term quality relationships with our clients and employees.

At **EASI**, we understand the complex challenges faced by modern facility management professionals. Whether you're looking to implement state-of-the-art building automation, require emergency mechanical services, or need a comprehensive preventative maintenance plan, our experienced and service-oriented technicians are available 24/7/365. We bring the skills, expertise, and knowledge to keep your systems and operations running at peak performance.

CORE COMPETENCIES

- ➔ **Building Automation** – Preventative maintenance, repair, retrofit, and new installation of building automation systems
- ➔ **Commercial HVAC** – Preventative maintenance, repair, retrofit, and new installation for boilers and chillers.
- ➔ **Electrical Services** – Control Wiring, Power Wiring, UL Panel Manufacturing, Access Control Systems, CCTV Systems
- ➔ **Energy & Sustainability Services** – BEPS benchmarking, retro-commissioning, utility rebate programs, and Energy Star certification support.

DIFFERENTIATORS

- ✓ Full-service provider of Building Automation Services, including turn-key installations and retrofits
- ✓ **EASI** is built from a strong foundation of highly trained staff of engineers, union technicians, and programmers that are ready to work with your Contractor, Design Engineer, or Manager on your Building Automation project to give you great value with an open protocol, web-based control system.
- ✓ UL Panel Manufacturing: Benefit from our custom electrical panels, manufactured to meet your specific needs with high quality and precision.
- ✓ Design Build Construction: Seamlessly integrate electrical systems into your new construction or major upgrades for a cohesive building design.
