

Aluminios de merica

Company Bio

With 60 years spanning three generations, **Aluminios de America** has evolved from a traditional glass and glazing company into a leader in engineering and architectural-focused design-build solutions.

Specializing in bespoke glass and aluminum systems, **Aluminios de America** helps clients achieve the "impossible" by delivering innovative, high-performance façade and structural solutions tailored to meet the most demanding project requirements

Core Competencies

- ★ Façade Design
- ★ Wind Design
- ★ Structural Design
- ★ High Wind Velocity Zone (Hurricane) Design
- ★ Seismic Design
- ★ Bulletproof Design
- ★ Blastproof Design
- ★ Manufacturing of Custom-Engineered Glass and Aluminum Systems

Differentiators

- ✓ **Bespoke Engineering Solutions** – Tailoring every project to the client's specific structural and aesthetic needs, ensuring optimal performance.
- ✓ **Extreme Condition Design Expertise** – Proven capability in designing and manufacturing systems that withstand hurricanes, seismic activity, blasts, and ballistic threats.
- ✓ **Legacy of Excellence** – Over six decades of industry experience, continuously evolving to push the boundaries of glass and aluminum engineering.
- ✓ **Innovation-Driven Approach** – Utilizing cutting-edge technology and engineering principles to create custom solutions beyond industry standards.
