## Company Overview

Founded in September 2017, just one week before Hurricane Maria devastated Puerto Rico, **Capstone** is a dedicated mechanical and general contractor with a strong commitment in construction and management. Our founder brings 37 years of extensive experience in engineering, including 12 years in the electric power industry, 2 years in medical manufacturing, and significant expertise in general contracting, logistics, precision coatings and welding. In our inception, we have participated in FEMA's Blue Roof and STEP programs and are currently working on projects for Federal and local governments as well as the private sector. At **Capstone**, we are focused on delivering high-quality construction services while fostering resilience and sustainability in the projects we undertake.
